- Cities: City of Duarte, City of Diamond Bar, City of Chula Vista, City of National City, City of Poway, City of Pismo Beach, Town of Mammoth Lakes

# **SITUATION SUMMARY**

## **California Department of Public Health Influenza Update**

- California continues to see higher than expected levels of hospitalization for influenza or influenza-like illness (ILI). While influenza activity varies from year to year and is unpredictable, California generally sees an increase in cases in late December or early January and it often peaks in February or March. The Hemagglutinin 3 and Neuraminidase 2 (H3N2) strain appears to be the predominant strain so far this influenza season and this strain is contained in the current influenza vaccine.
- The Medical and Health Coordination Center (MHCC) continues to remain activated in response to the increase in ILI and medical surge occurring throughout California. The MHCC will distribute a Public Health and Medical (Emergency Function 8) Situation Report related to influenza on Wednesday of every week until conditions improve and stabilize.
- The MHCC has received two local situation reports from Amador and Stanislaus Counties. There are no resource requests or significant impacts requiring state assistance at this time.
- Please see attached for full report.

# **WEATHER OF CONCERN**

## **Weather of Concern**

- A winter storm will bring widespread precipitation to portions of Northern and Central California into early Saturday.
  - Several feet of snow are possible at pass levels which will make for hazardous mountain travel with chain controls and travel delays likely.
  - Gusty winds are possible Thursday into Friday, strongest Thursday afternoon and again Friday. These winds are not expected to be as strong as with recent storms.
  - The wet pattern may continue Sunday night into next week with several additional storms on the way.

## **Active Weather Warnings, Watches and Advisories by County:**

[http://www.wrh.noaa.gov/sto/brief/www\\_bc\\_cal.php](http://www.wrh.noaa.gov/sto/brief/www_bc_cal.php)

# Key Points

02/02 – 02/08

## Thursday-Friday

- Snow will impact travel over the Sierra and mountains of northern CA
- Gusty winds will impact travel and may caused downed tree branches and localized power outages over portions of northern and central CA
- Localized flooding possible due to heavy rain across central and northern CA

## Saturday

- No significant weather impacts expected

## Sunday-Tuesday

- Snow will impact travel over the Sierra and mountains of northern CA

## Wednesday

- No significant weather impacts expected

Heavy Rain/ Localized Flooding	C & N CA	C & N CA					
River Flooding							
Severe Weather							

	High Threat
	Moderate Threat
	Slight Threat
	No Discernible Threat

# WEATHER SYNOPSIS BY REGION

## **NORTHERN CALIFORNIA**

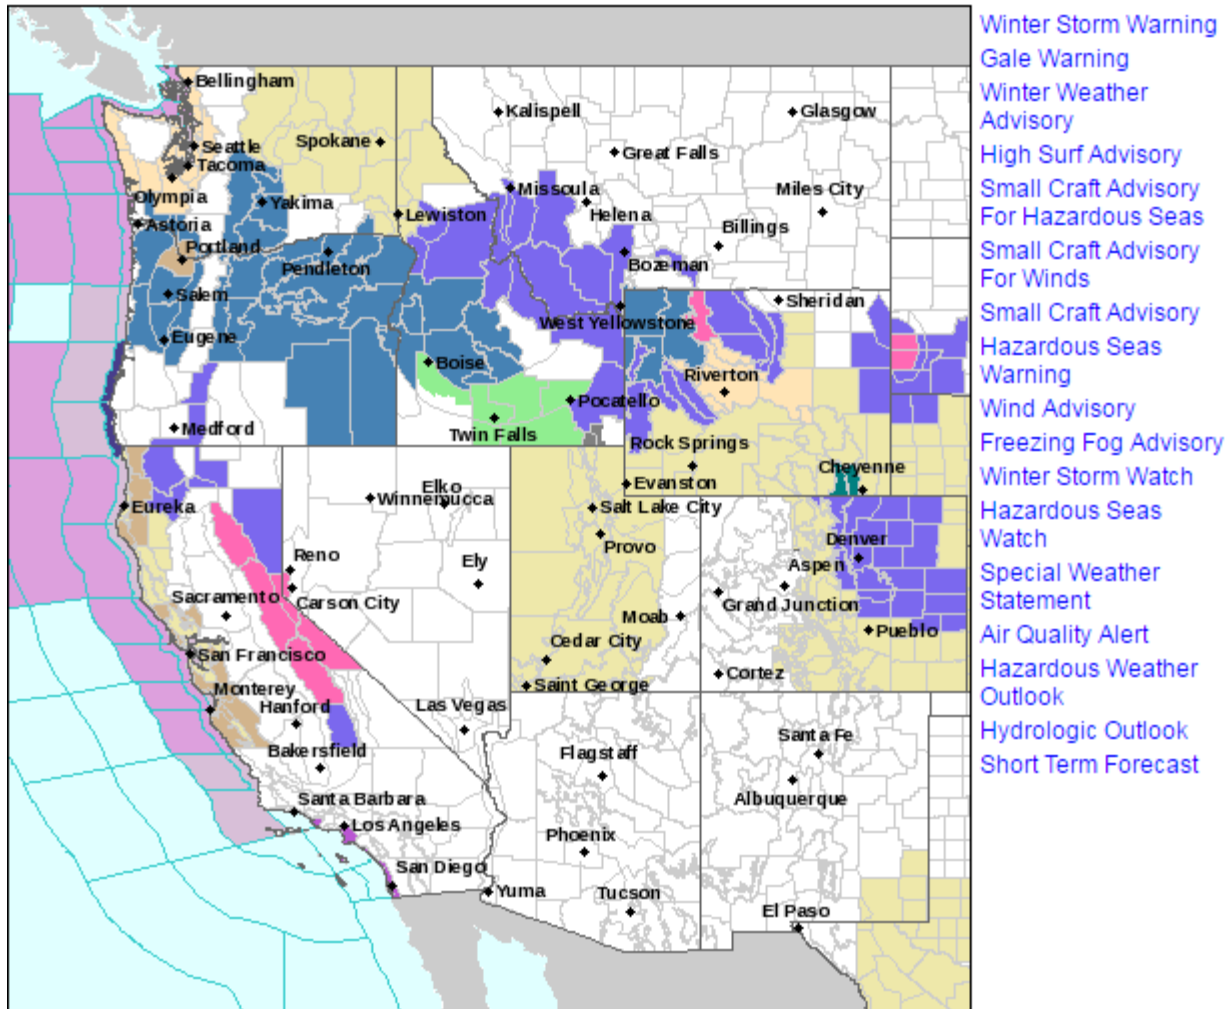

A Pacific storm system is just offshore and plenty of mid and high cloudiness is already spreading over the region. On and off moderate to heavy precipitation will continue through early Saturday, followed by occasional showers during the remainder of Saturday and most of Sunday. Gusty southeast to southwest winds will develop in wind-prone higher terrain areas late today, with peak gusts near 35 mph. By Friday peak gusts may reach 50 mph, with many other open areas seeing gusts of 25-35 mph. Snow levels will be around 4500 feet in the north and 6000 feet in the south until Friday then drop by about 1000 feet. Another system will move in Sunday night with similar snow levels, and it will continue until early Tuesday. In general, the region will be in a pattern where a Pacific storm system will move in every 2-3 days through mid February, continuing the wet unsettled and occasionally windy conditions.

## **SOUTHERN CALIFORNIA**

The ridge of high pressure over California will continue to weaken today causing temperatures to cool to a little above normal and humidity to increase some. Maximum temperatures will be in the 50s to low 60s across the mountains and 60s to low 70s in the valleys. Minimum humidity will be mainly between 12% and 25% away from the San Joaquin Valley and coast today. A couple of Pacific storms will bring periods of showers to the region Thursday through early next week. The first storm will bring showers to Central California starting Thursday morning and to Southern California starting Friday morning. Showers from the first storm will end Friday night. Rainfall amounts continue to look the same, with 1 to 4 inches of rainfall over the higher terrain of Central California and a quarter inch to an inch for the coastal and valley locations. Southern California will receive less than a quarter inch of rainfall. The snow level will be between 7,000 and 8,000 feet. South to west winds of 15 to 25 mph with gusts to 40 mph will surface across the wind prone mountain and desert areas this afternoon through Friday night. The second storm will bring showers to the area Sunday night through early next week, with similar rainfall amounts as the first storm. The snow level will drop to between 6,000 and 7,000 feet. South to west winds of 20 to 40 mph with gusts to 60 mph will surface across the mountain ridges and desert passes Sunday afternoon through Tuesday night. Isolated showers will be possible especially across the higher terrain in between storms. Temperatures will be near normal Thursday through early next week, with mid 40s to mid 50s across the mountains and upper 50s and 60s in the valleys.
